DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

I: a sensor having an optical fiber plate, wherein an area is larger than half of an optical fiber (claims 4-6);

II: a sensor having a LCD and a backlight, wherein components are arranged below the LCD (claims 7-9);

III: a sensor having a LCD, a backlight and an optical fiber plate, wherein components are arranged below the LCD (claims 10-12);

IV: a sensor having a LCD and a backlight, wherein the LCD comprises RGB pixels, components are arranged below the LCD and a size of a unit pixel of the LCD is an integer multiple of a unit pixel of the sensor (claims 13-15);

V: a sensor having a LCD, a backlight and an optical fiber plate, wherein the LCD comprises RGB pixels, components are arranged below the LCD and a size of a unit pixel of the LCD is an integer multiple of a unit pixel of the sensor (claims 16-18);

VI: a sensor having a LCD and a backlight, wherein the LCD comprises RGB pixels and components are arranged below the LCD (claims 19-21);

VII: a sensor having a LCD, backlight and optical fiber plate, wherein the LCD comprises RGB pixels and wherein components are arranged below the LCD (claims 22-24).

Art Unit: 2878

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-3 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. A telephone call was made to John Hayden on November 18, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 2878

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
